Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4-8, 14, 15 and 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Amended claim 1 is confusing since applicant adds a proviso, 'comprises solid particles in a liquid, and the constituents containing the functional groups (A) and the constituents containing the functional groups (B) are present together in the solid particles, but claim 1 still recites "(I) constituents containing ----, in a weight ratio of from 50:1 to 1:50" being directed to separate particles of (A) and (B). Claim 4 reciting different particles improperly broadens the scope of claim 1. The recited sections iii-vi (functional groups A and B present separately) also improperly broadens the scope of claim 1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams et al (US 5,379,947) and EP 0 844 286.

Rejection is maintained for reason of record with following response.

A clearcoat is a cured coating and thus the presence of functional groups A and B in the same powder or separate powders is immaterial since said powders melt and react together during coating (or curing).

Applicant's traversal with respect to the restriction is acknowledged. Process claims will rejoin with claim 1 when said claim 1 is allowed. Deletion of "type" in line 6 of claim 11 is also suggested.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
